

4 Courses

Blockchain Basics

Smart Contracts

Decentralized Applications  
(Dapps)

Blockchain Platforms

12/13/2018

## Ramakrishnan Ambravaneswaran

has successfully completed the online, non-credit Specialization

# Blockchain

Through this specialization, learners developed an understanding of foundational concepts that enable a blockchain protocol. The courses covered applying the concepts of encryption, hashing, consensus, transactions, blocks and private-public keys in building a blockchain. Learners designed, developed and tested smart contracts and decentralized applications on a private Ethereum blockchain. The discussions included the architecture of a decentralized application stack, best practices, emerging standards, and many open issues such as scalability and privacy. Learning concluded with a holistic view of the landscape, including decentralized application use cases and other blockchain platforms.

*Bina Ramamurthy Timothy Leyh*

Bina Ramamurthy,  
Teaching Professor of  
the University at Buffalo  
Computer Science and  
Engineering Department

Timothy Leyh, Executive  
Director of the University  
at Buffalo Center for  
Industrial Effectiveness
